

Visit Instron® at TEI of Western Macedonia – Thursday 28th November 2013

Instron is pleased to invite you to our metals workshop to be held at the [TEI of Western Macedonia](#) in Kozani on Thursday 28th November. We look forward to welcoming you and presenting our range of testing solutions for [metals applications in aerospace, energy, construction, transportation and many more.](#)

For nearly 70 years Instron has been designing and manufacturing class-leading materials testing systems. Our latest developments contain a host of user-orientated features designed to improve the quality of mechanical testing.

During the workshop will be demonstrating:

[5989 Floor Model Universal Testing System](#) – ideal for performing high capacity tests up to 600kN

[CEAST 9350 Floor Standing Impact System](#) – for a range of impact applications including tensile impact, puncture, Izod and Charpy

Do you have questions about your testing applications? During the event our product specialists will be hosting seminars to discuss your testing needs.

Availability is limited so please [reserve your space](#) soon for this event.

We look forward to seeing you at the TEI of Western Macedonia.
